MEMORANDUM

8 August 1952

TO: ☐ ☒ /AECOR/REDSOX  
FROM: ☐ ☒ /NO  
SUBJECT: Medical Reports - ☐ (A-O-288), ☒ (A-O-289)  
ATTN: ☐ ☒

<sup>CAMBARO-2</sup>  
The above two dependents of an indigenous agent underwent routine medical examinations on 29 July 1952:

1. ☐ ☒ (A-O-288):

History: No significant history was noted.

Physical Examination: Functional pulmonary systolic murmur. (A pelvic examination was not included).

Laboratory Studies: Chest x-ray, urinalysis, and serologic test for syphilis were all within normal limits.

Disposition: Physically fit.

2. ☐ ☒ (A-O-289)

History: Scarlet Fever, November 1951, no apparent residue.

Physical Examination: No abnormalities were noted.

Laboratory Studies: Urinalysis, chest x-ray, and serologic test for syphilis were all within normal limits.

Disposition: Physically fit.

Both received immunizations against Smallpox.

Sincerely,
